Boulder Irrigation and Water
Development Company,
Board of Directors,
Boulder, Utah.

Dear Sirs:

Pursuant to a letter of June 5th, from the State Engineer, I feel that in order for us to have a clear basis of understanding, that I no longer be considered as being water commissioner unless the Board feels that a commissioner is needed and that the Company desires to go through the necessary legal procedure to get an appointment from the State Engineer.

I feel that a commissioner should not be directed by any water user or group of users but that he should base his actions upon the laws of the State, the decrees of the Courts and under the supervision of the State Engineer.

It is my opinion that I would be able to serve the interests of the Company better if I were appointed as either adviser to the water-masters for the season or else as chairman of a distribution committee of three, including the two water-masters and myself, with the problems of policy and of determination of rights left in the hands of the Board. Then, at least I feel that, I would have a more clear understanding of the scope and nature of my responsibility, relative to my position in the Company.

Yours very truly,

(SGD) FRANKLIN C. HANSEN
